**Instructions for Selecting the Target Class --**

**Mathematics Instruction** -- For all questions about classroom practices please refer only to activities in the mathematics class that you teach. If you teach more than one mathematics class, select the first class that you teach each week. If you teach a split class (i.e. the class is split into more than one group for mathematics instruction) select only one group to describe as the target class.

Please read each question and the possible responses carefully, and then mark your response by filling in the appropriate circle in the response section. A pen or pencil may be used to complete the survey.

## INSTRUCTIONAL ACTIVITIES IN MATHEMATICS

Listed below are questions about the types of activities that students in the target class engage in during mathematics instruction. For each activity, you are asked to estimate the relative amount of time a typical student will spend engaged in that activity during classroom instruction over the course of a school year. The activities are not necessarily mutually exclusive; across activities, your answers will undoubtedly greatly exceed 100%. Consider each activity on its own, estimating the range that best indicates the relative amount of mathematics instructional time that a typical student spends over the course of a school year engaged in that activity.

<b>AMOUNT OF INSTRUCTIONAL TIME</b> (for the school year)

## **SURVEYS OF ENACTED CURRICULUM®**

---

---

### **Survey Of Instructional Content**

#### **Teacher Survey**

#### **Grades K-8**

#### **Mathematics**

---

---

The following pages request information regarding topic coverage and your expectations for students in the target mathematics class **for the current school year**. The content matrix that follows contains lists of discrete topics associated with mathematics instruction. The categories and the level of specificity are intended to gather information about content across a wide variety of programs. It is not intended to reflect any recommended or prescribed content for the grade level and may or may not be reflective of your local curriculum.

**Please read the instructions on the next two pages carefully before proceeding.**

## Step 1: Indicate topics not covered in this class

Begin by reviewing the entire list of topics identified in the topics column of each table, noting how topics are grouped. After reviewing each topic within a given grouping, if none of the topics listed within that group receive any instructional coverage, circle the "<None>" in the "Time on Topic" column for that group. For any individual topic which is not covered in this mathematics class, fill in the circled "zero" in the "Time on Topic" column. (Not necessary for those groups with "<None>" circled.) Any topics or topic group so identified will not require further response. [Note, for example, that the class described in the example below did not cover any topics under "Instructional Technology" and so "<None>" is circled.]

## Step 2: Indicate the amount of time spent on each topic covered in this class

Examine the list of topics a second time. This time note the amount of coverage devoted to each topic by filling in the appropriately numbered circle in the "Time on Topic" column based upon the following codes:

- 0 = None, not covered**
- 1 = Slight Coverage** (less than one class/lesson)
- 2 = Moderate Coverage** (one to five classes/lessons)
- 3 = Sustained Coverage** (more than five classes/lessons)

### Step 3: Indicate relative emphasis of each student expectation for every topic taught

The final step in completing this section of the survey concerns your expectations for what students should know and be able to do. For each topic area, please provide information about the relative amount of instructional time spent on work designed to help students reach each of the listed expectations by filling in the appropriately numbered circle using the response codes listed below. (Note: To the left of each content sheet you will find a list of descriptors for each of the five expectations for students.)

- 0 = No emphasis** (Not an expectation for this topic)
- 1 = Slight emphasis** (Accounts for less than 25% of the time spent on this topic)
- 2 = Moderate emphasis** (Accounts for 25% to 33% of the time spent on this topic)
- 3 = Sustained emphasis** (Accounts for more than 33% of the time spent on this topic)

**Note:** A code of "3" should typically be given for only one, and no more than two expectation categories within any given topic. No expectation codes should be filled-in for those topics for which no coverage is provided (i.e., circled "0" or "<None>").
